

POWERPOLE: CLIMB FASTER

PowerPole makes traditional scaffolding and pump jack systems a thing of the past. The streamlined design grants you quick access up to 75 feet (22.86 m). Remove the manual labor of pumping or cranking and replace it with easy, powered access!

FAST + EFFICIENT

- Quick setup with no roof rigging
- Perfect for tight spaces
- Accommodates platforms up to 28 in. (711 mm) wide
- Landscape-friendly setup
- Three times faster than a pump jack

IDEAL FOR:

- Siding, painting, and wall coating
- Window installation, caulking, and glazing
- Tuckpointing, patching, and repair
- Waterproofing and cleaning

SYSTEM ACCESSORIES

GENERAL SPECIFICATIONS

Maximum Rated Load on Climbing Unit	650 lbs (295 kg) (1300 lbs (590 kg) per pair)
Safety Devices	Lock Lever, Manual Crank, Integrated Overspeed Brake
Maximum Climbing Speed	25 ft/min (7.6 m/min)
Maximum Platform Height	69 ft (21.03 m)
Maximum Work Height	75 ft (22.86 m)
Platform Sizes	Up to 40 ft (12.19 m) x 28 in. (711 mm)
Single Person Platform Size	26 in. (660 mm) x 36 in. (914 mm) x 42 in. (1067 mm)

POWERPOLE TILT-UP SPECIFICATIONS

Maximum Midspan Tie Spacing	16 ft (4.88 m)
Maximum Untied Work Height (Requires Outriggers)	24 ft (7.32 m)
Maximum Height without Midspan Tie (with Outriggers)	40 ft (12.19 m)

Note: Specifications subject to change without notice.

▶▶ SYSTEM FEATURES

CLIMBING UNIT + GEARBOX ▶

Powered by a 1/2-inch drill, the PowerTrak™ system has a 650-pound (295 kg) load rating and is three times the speed of a pump jack system. Our durable gearbox eliminates typical electrical components, keeps the system lightweight, and features an overspeed brake for added safety.

QUICK ATTACH POLES + COUPLERS ▶

Updated, streamlined, extruded aluminum poles are lightweight for easy hauling and installation. The tools-free coupler allows for quick assembly. The pole's contoured profile assists with grip, both during assembly and when tilting the system into place.

EXTENDABLE V-BRACE ▶

The extendable v-brace, when retracted, is the same size as the standard v-brace, and can move in 2-inch (51 mm) increments to expand for a total wall distance of 51 inches (1295 mm).

SUPER STANDOFF TIE ▶

The super standoff tie has extra long tubes to allow roof access. By placing the platform at roof level, the PowerPole tilt-up system can serve as roofline fall protection.

PLATFORM SUPPORT ▶

The platform support is used for dual mast configurations and is installed with the PowerLatch connector. With 16 inches (279 mm) of adjustment, this support easily accommodates a wide range of standard work platforms.

OUTRIGGER ASSEMBLY ▶

The rugged steel stabilizers keep you pressed into the wall, allowing a 24-foot (7.32 m) work height without tying into the structure. Each side of the outrigger has a stabilizer that adjusts 8 inches (203 mm) to level the system.

SINGLE PLATFORM ▶

The single-person platform features dual entry and a large 36-inch (914 mm) wide by 26-inch (660 mm) deep work area, providing ample space for you and your tools. The platform quickly attaches to the climbing unit via the PowerLatch.
